Remote Hybrid Fleece

The Husqvarna Motorcycles Remote Hybrid Fleece is a lightweight, breathable jacket with PrimaLoft® Next insulation and Tecnostretch fleece inserts. PrimaLoft® Next is an innovative, thin padding that is modeled after structures found in nature. It is constructed with fibers of alternating lengths (that traps air/creates air pockets) and deniers to create natural highs and lows in the material, which ensures optimal thermal performance. The smart material mix of this lightweight jacket results in an all-season garment which delivers warmth when at rest and extreme breathability when active. The four-way-stretch materials ensure perfect freedom of movement. Combined with our waterproof Remote Parka, the customer is prepared to face all elements.
